

The Inventory of Historic Battlefields – Battle of Stirling Bridge

The Inventory of Historic Battlefields is a list of nationally important battlefields in Scotland. A battlefield is of national importance if it makes a contribution to the understanding of the archaeology and history of the nation as a whole, or has the potential to do so, or holds a particularly significant place in the national consciousness. For a battlefield to be included in the Inventory, it must be considered to be of national importance either for its association with key historical events or figures; or for the physical remains and/or archaeological potential it contains; or for its landscape context. In addition, it must be possible to define the site on a modern map with a reasonable degree of accuracy.

The aim of the Inventory is to raise awareness of the significance of these nationally important battlefield sites and to assist in their protection and management for the future. Inventory battlefields are a material consideration in the planning process. The Inventory is also a major resource for enhancing the understanding, appreciation and enjoyment of historic battlefields, for promoting education and stimulating further research, and for developing their potential as attractions for visitors.

Inventory of Historic Battlefields

STIRLING BRIDGE

Alternative Names: Stirling Brig

11 September 1297

Local Authority: Stirling

NGR centred: NS 800 949

Date of Addition to Inventory: 30 November 2011

Date of last update: 14 December 2012

Overview and Statement of Significance

The Battle of Stirling Bridge is significant as one of the most prominent Scottish victories of the Wars of Independence. It is the high point of the campaign of William Wallace and Andrew Moray on behalf of the exiled John Balliol, and leads to Wallace's appointment as Guardian of the Realm of Scotland. It also holds a prominent cultural legacy, both in its connection to Wallace and in the wider legacy of the Wars of Independence within Scotland. Finally, the heavy nature of their defeat is an immense shock to the English, and Edward I himself returns to Scotland the following year in another attempt to crush the Scot's resistance.

A large English army, moving north to deal with Moray's successes, attempted to cross the Forth at Stirling using the single narrow bridge. Moray and Wallace were a little to the north-east at Abbey Craig awaiting them, from where they allowed some of the English troops to cross, and then swept down on them.

One of the English commanders, Hugh de Cressingham, was killed, along with many of his men. The victory bolstered Wallace's position, particularly as Moray later died of wounds received in the battle, while the English drew back temporarily. However, the following year, Edward's armies returned and defeated Wallace at the Battle of Falkirk.

Inventory Boundary

The Inventory boundary defines the area in which the main events of the battle are considered to have taken place (landscape context) and where associated physical remains and archaeological evidence occur or may be expected (specific qualities). The landscape context is described under *battlefield landscape*: it encompasses areas of fighting, key movements of troops across the landscape and other important locations, such as the positions of camps or vantage points. Although the landscape has changed since the time of the battle, key characteristics of the terrain at the time of the battle can normally still be identified, enabling events to be more fully understood and interpreted in their landscape context. Specific qualities are described under *physical remains and potential*: these include landscape features that played a significant role in the battle, other physical remains, such as enclosures or built structures, and areas of known or potential archaeological evidence.

Inventory of Historic Battlefields

The Inventory boundary for the Battle of Stirling Bridge is defined on the accompanying map and includes the following areas:

- The area of the bridges across the River Forth, including the location of the known wooden Medieval bridge, as the likely crossing point for the English army.
- The floodplain of the Forth on the northern side, where the rugby club and surrounding development now lie and where much of the fighting is likely to have occurred.
- Causewayhead Road, which was the route the English intended to take northwards.
- Abbey Craig, at the foot of which Wallace and Moray were mustered.
- The area on the south side of the river at Raploch where de Warenne had camped with his army.
- The area of Riverside where Lundie intended to ford the river to attack Wallace in the rear.
